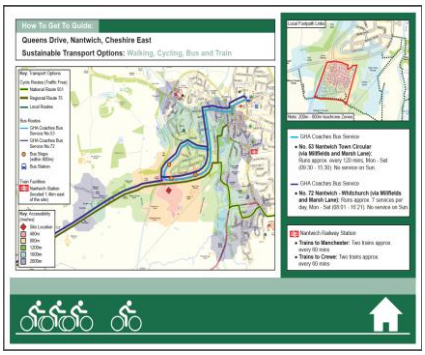
TRAVEL PLAN SERVICES

Transportation Planning : Infrastructure Design

Event Assistance & Site User Engagement



We provide a range of support to deliver and promote a travel plan to site users, including running events and promotions, and providing personalised travel planning to individuals to assist with modification of travel patterns.

We have experienced staff who would be pleased to assist you with the design, set-up and running of events for your staff, residents or students. Events would typically comprise the following:

- Located in a busy area of your site, for example, a cafeteria or close to local shops or a local centre;
- Provide a range of information to cover all modes of transport, including:
    - Public transport journey planning assistance, timetables and service route maps;
    - Cycle maps and details of available training and maintenance courses;
    - Details of lunchtime / short walks along with available services within walking distance;
    - Details of any local car share schemes and how to register;
    - Advice on alternatives to travelling such as working from home and home shopping;
- Accommodate further assistance in the form of personalised travel planning, which would provide a greater level of detail to the individual on their available travel alternatives.

Please do let us know if you'd like us to arrange an event or assist with one you're organising!
