

Steering Group Support

Steering groups bring together a number of interested parties to discuss and influence the direction of a travel plan, with discussions including monitoring, promotional activities and materials, etc.

Steering groups are appropriate in a number of situations:

- Framework travel plans for multi-occupier sites: where a number of organisations are present, who may need to agree how an area-wide travel plan is to be implemented, future measures etc.;
- Workplace travel plans: bringing staff from different departments together to ensure that the needs of all parts of the business are accommodated within the forward travel plan programme;
- Educational travel plans: bringing staff and students from different departments/faculties and sites together to ensure that the needs of all parties are accommodated and measures are appropriate for the audience;
- Residential travel plans: bringing the managing agent together with interested residents to discuss pertinent issues and support which would assist beneficial travel pattern changes.

SCP would be pleased to support your steering group; from developing agendas to leading the meeting, our experienced staff are on hand to help.
